

Compliance with EU-REACH (1907/2006)

March 2021

Dear Valued Customer,

System Sensor takes its compliance with REACH very seriously.

In accordance to Article 33 of EU-REACH Regulation (1907/2006) which states:

1. Any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.
2. On request by a consumer, any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (w/w) shall provide the consumer with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.

We inform you that the items in the list on the website below do contain SVHC substance(s) above the threshold level of 0.1% by weight.

At System Sensor we commit to create highly reliable and sustainable products. We will put all our efforts to remove all the SVHC substances from our products where technically feasible without compromising product performances.

System Sensor Europe hereby certifies that:

- our products do not contain any other REACH restricted materials during the manufacturing, storage or handling process.
- to the best of our knowledge and based on the information provided by our suppliers, all products not mentioned in our SVHC list do not contain any of the substances of very high concern ie. at or above the corresponding threshold limit values.

This up-to-date list of affected products have been uploaded to our System Sensor Europe website (see link below). This list will be updated once a year, accordingly to ECHA candidate list inclusion release.
